

BEAVERTON POLICE DEPARTMENT

GENERAL ORDER

NUMBER: 13.01.00
SUBJECT: DATA AND OTHER ANALYSIS
EFFECTIVE: AUGUST 1, 1999
REVIEW: AUGUST 2002, 2005, 2008

1. DATA AND OTHER ANALYSIS. Data is collected and compiled using a number of methods by Records and Crime Analysis to track activities within the City of Beaverton. Data systems currently in use by the department are as follows:

A. Oregon Uniformed Crime Reports (OUCR). The reports are compiled from police reports written on a daily basis by police personnel. Data such as numbers and types of crimes, detail on arrest and arrested personnel and officer reports by category are available on this system.

B. Washington County Consolidated Communications Agency (WCCCA). On-line data is available about calls for services processed and/or dispatched by WCCCA.

C. Portland Police Data System (PPDS). Our police reports are processed into this system on a daily basis. Crime data, criminal history, person of interest, pawn shop, field contact report (FCR), and persons are some of the data available by terminal.

D. Map Info. This is an electronic "pin map" that allows the "overlay" of a variety of data by census track, grid, district, and/or neighborhood association.

E. Court SQL System. This system tracks traffic citations issued by department personnel since 1992.
